## EXPERIENCE

### Umbel

2013 - PRESENT

#### Front-End Web Developer

I design, build, and maintain our product, website, and internal tools. The product is a real-time dashboard that visualizes information about our clients' audience.

Side work projects include custom client data visualizations, building physical data experiences, writing information design articles, and building virtual reality photobooths.

### OwnLocal

2012 - 2013

#### User Experience Intern

I designed & prototyped new features, focusing on usability and client experience. Additionally, I created a large library of icons for business categories.

### University of Texas, Austin

2011 - 2013

#### Lab Manager

I helped design and run brain imaging (fMRI) experiments, focusing on the neuroanatomy of learning and memory.

## EDUCATION

### University of Texas, Austin

Non-degree seeking

Attended courses on Information Design

### Trinity College

BS in Neuroscience, Psychology

Minor in Cognitive Science & Chinese

## SKILLS

Modern web development

React/Redux

Angular

ES6

UI/UX design

Data Visualization

D3.js

Data processing/analysis

Visualization conceptualization

Data best practices

## INTERESTS

The future of data visualization

I'm passionate about utilizing new technology to enhance and surpass current methods of storytelling with interactive experiences.
